

Abdishakur Ali Mohamed

Software engineer with 5+ years of production experience across fintech, point-of-sale, and EdTech platforms — React, Next.js, Node.js/NestJS, Python/Django, PostgreSQL, AWS, and Google Cloud Platform. Led engineering for a production HORECA POS platform used by hospitality businesses across Europe.

EXPERIENCE

Founder & Full-Stack Engineer - Garaad.org Jan 2024 - Present
Remote

- Built and maintain a production education platform with Next.js, React, Django, PostgreSQL, Stripe, Vercel, subscriptions, role-based access, video delivery, and SEO content.
- Own product, architecture, deployment, support, content systems, and AI-assisted engineering workflows.

Lead Product Engineer - FranchiseTech Feb 2023 - Present
Part-time · Remote · Bucharest, Romania (side project since Aug 2026)

- Led engineering for a production HORECA/POS platform for hospitality businesses: till, payments, kitchen display, tables, inventory, recipes, accounting, and reporting.
- Led a small cross-functional team (design, frontend, backend, mobile); owned infrastructure, technical direction, and stakeholder communication end to end.

Full-Stack Engineer - Upwork / Freelance Dec 2022 - Present
Remote

- Delivered websites, dashboards, SaaS features, Odoo implementations, client systems, support, production handover, and business systems for international clients.
- Projects include UREP, Dolcenera, Frizerului, and custom business operations workflows.

Project Manager / Product Builder - ikit Software Solutions Feb 2023 - Jul 2023
Contract · Remote

- Managed notary and remittance product work from requirements through delivery with customers, developers, and stakeholders.

Backend Product Engineer - Faremit Aug 2021 - Mar 2024
Part-time · Remote

- Built backend services for a cross-border payments platform: wallet flows, explicit transaction-state workflows, Stellar/Horizon signing, KYC/AML checks, AWS infrastructure, and release delivery.

Frontend Developer - Sibrar Technology Apr 2022 - Jan 2023
On-site

- Built production frontend interfaces with React, Tailwind CSS, Redux, responsive layouts, and component-based workflows.

SELECTED PROJECTS

- FranchiseTech** - hospitality POS and business operations platform.
Garaad - production education platform with subscriptions and RBAC.
Faremit - cross-border payments product with wallet and transaction workflows.
UREP - Odoo-powered NGO website and operational setup.
Dolcenera / Frizerului - client websites and onboarding flows.
